

A vibrant Summer Tanager bird, with bright orange-red plumage, is perched on a dark, textured branch. The bird is facing left, with its head slightly turned. Its beak is small and pointed. The background is a clear, bright blue sky, with several green leaves and branches visible, some in focus and others blurred. The lighting is bright, suggesting a sunny day.

# Clear your mind and listen.

Find your happy place on an Alabama birding trail.
